FOREWORD

This manifesto is not a political document — it is a covenant. A binding promise between myself and every man, woman, and child of Gombi/Hong Federal Constituency.

My dear people of Gombi and Hong,

I stand before you not as a stranger seeking your favour, but as a son who has returned — summoned by your voices, your needs, and your unshakeable belief that better representation is possible. I have served you before. You witnessed my tenure in the Adamawa State House of Assembly from 2015 to 2019, where I rose to the position of Majority Leader. You watched me drill boreholes when your wells ran dry. You saw me build classrooms when your children sat under open skies. You were there when I fought for the rights of our internally displaced brothers and sisters.

The 2027 elections present us with a defining moment. Gombi/Hong Federal Constituency has been represented without distinction for too long. Our roads remain broken. Our health centres are understaffed. Our youths are under-employed. Our farmers lack inputs. Our women are underempowered. This must change — and it will change.

This manifesto represents five years of listening — to the cries of mothers who cannot afford hospital bills, to the frustration of young graduates who cannot find work, to the anger of farmers who harvest more sorrow than profit, and to the quiet resilience of communities that have survived insurgency, displacement, and neglect. I have heard you. And I have put every one of those conversations into the pages that follow.

I am not coming to Abuja to warm a seat. I am coming to fight — to fight for federal allocations for our roads, to fight for constituency development funds to reach your communities, to fight for policies that make farming profitable and youth entrepreneurship viable. I am coming to make the voice of Gombi/Hong heard in every committee room and on every legislative floor of the National Assembly.

"Politics is no longer by political parties alone — it is by individuals and personalities. And I am a personality that has proven, time and again, that I serve my people first."

I present this manifesto with humility, with purpose, and with the full weight of my experience, my resources, and my commitment behind every word. It is detailed because your needs deserve serious answers. It is ambitious because you deserve ambitious representation. And it is personal because you, the people of Gombi and Hong, are personal to me.

Together, we will build back better.

Hon. Hassan Mamman Barguma

Labour Party Candidate, Gombi/Hong Federal Constituency

ABOUT THE CANDIDATE

A man of the people, forged in service — from the halls of the Adamawa State House of Assembly to the grasslands of Hong, Hon. Barguma's life is a story of purpose, sacrifice, and relentless advocacy.

Personal Profile

Full Name: Hon. Hassan Mamman Barguma

Date of Birth: July 12, 1969

Origin: Hong Local Government Area, Adamawa State

Education: Environmental Sciences (Town Planning Specialisation)

Party: Labour Party (LP)

Position Sought: Member, House of Representatives — Gombi/Hong Federal Constituency

Website: www.hassanbarguma.com

Legislative Career

Hon. Barguma's entry into public life in 2015 was immediately transformative. Contesting the Hong State Constituency seat in the Adamawa State House of Assembly on the platform of the All Progressives Congress (APC), he won convincingly — a testament to the trust his community placed in him. During his four-year tenure from 2015 to 2019, he distinguished himself as a legislator of rare quality and uncommon dedication.

He rose swiftly through the ranks to become Majority Leader of the Adamawa State House of Assembly — a position that placed him at the centre of the legislative agenda, responsible for coordinating floor debates, mobilising votes for progressive legislation, and serving as a bridge between the executive and the legislature. In this role, he championed bills targeting social welfare reform, the protection of the rights of internally displaced persons (IDPs), and the improvement of community infrastructure.

His legislative philosophy was simple but powerful: every bill must improve a life in Gombi or Hong. This conviction drove him to sponsor and support legislation that resulted in tangible outcomes — from water supply projects to rural road improvements, from school construction to healthcare upgrades. He was not a legislator who merely attended sittings; he was one who made every sitting count.

ABOUT THE CANDIDATE

Business and Entrepreneurship

Beyond the legislature, Hon. Barguma is a successful entrepreneur and developer with a strong presence in Abuja's real estate and construction sector. Known in business circles as a "field marshal builder" and a "golden boy of Abuja," he has built a reputation as a developer whose work combines commercial excellence with social purpose.

His business ventures have created jobs, contributed to urban development, and generated wealth — not merely for himself, but for employees, contractors, and communities connected to his projects. This entrepreneurial background equips him uniquely for the legislative role: he understands how businesses operate, what impedes economic growth, and how government policy either unlocks or stifles private sector development.

Critically, his business success has funded his philanthropic activities. He has drilled boreholes in water-scarce communities, built classrooms in schools that had no walls, constructed clinics where the nearest health facility was hours away, and supported vulnerable individuals — not waiting for government resources, but using his own. This is the measure of a leader who does not separate personal prosperity from communal responsibility.

Track Record at a Glance

- 4 Years in Adamawa House of Assembly
- Position: Majority Leader
- 50+ Boreholes & Water Projects
- 20+ Classrooms Built
- 10+ Clinics & Health Facilities Supported
- 1,000s of IDPs Advocated For
- 2 LGAs — One Vision
- 2027: Year of Renewed Mandate

THE STATE OF OUR CONSTITUENCY

To build a better future, we must first be honest about the present. Gombi/Hong Federal Constituency faces profound challenges — but also enormous, unrealised potential.

Gombi Local Government Area

Gombi LGA is predominantly agricultural, with farming communities spread across hilly and semi-arid terrain. The area is home to diverse and vibrant ethnic communities, including the Hona, Lala, Boga, Huba (Kilba), Bura, Fulani, Hausa, and many others who have farmed this land for generations. This rich ethnic tapestry is a source of cultural strength and communal identity. Despite its agricultural richness, Gombi's farmers face persistent challenges: erratic rainfall, poor access to inputs, near-absent irrigation infrastructure, and limited market connectivity. Road networks are in disrepair, cutting communities off from markets and services. Primary healthcare centres are understaffed and undersupplied. Schools suffer from poor infrastructure and teacher shortages. The town of Gombi itself, while a local administrative hub, lacks the urban services that should accompany its status.

Hong Local Government Area

Hong LGA shares similar agricultural strengths and is home to a diverse range of ethnic communities, including the Higgi (Kamwe), Margi, Fulani, and many others who have long shaped the culture, commerce, and character of the area. Hong has been additionally impacted by the Boko Haram insurgency that ravaged the Lake Chad Basin region. Communities in Hong experienced displacement, destruction of property, loss of livelihoods, and the trauma of prolonged insecurity. While relative peace has returned, reconstruction has been slow and inadequate. Thousands of previously displaced persons have returned to find their homes destroyed and their farms unattended. Access to psychosocial support, livelihoods rehabilitation, and adequate security presence remains insufficient. The resilience of Hong's people — across all their communities — is extraordinary; but resilience alone cannot substitute for government support.

The Shared Challenges

- Youth unemployment exceeding 40% in both LGAs, driving migration to urban centres
- Crumbling federal and state road infrastructure, particularly the Gombi-Hong-Mubi corridor
- Primary healthcare centres without doctors, drugs, or basic diagnostic equipment
- Schools without furniture, roofs, or qualified teachers
- Farmers without access to improved inputs, credit, or reliable irrigation
- Women sidelined from economic and political participation
- Persistent farmer-herder conflict straining community cohesion
- Inadequate representation in federal agencies, commissions, and appointments
- Limited digital infrastructure, leaving communities disconnected from the information economy

"Gombi and Hong are not poor constituencies — they are underrepresented ones. Under the right leadership, their potential is limitless."

AGRICULTURE & RURAL DEVELOPMENT

Agriculture is not just our economy — it is our culture, our heritage, and our path to prosperity. We will make farming in Gombi/Hong profitable, dignified, and sustainable.

Why Agriculture Must Be the Priority

More than 70% of residents in Gombi/Hong are engaged in agriculture — farming cereals, legumes, cotton, and vegetables, and raising livestock. Yet agricultural productivity remains far below potential. Yields are suppressed by poor-quality inputs, unreliable rainfall, minimal irrigation, and disconnection from markets. Post-harvest losses are devastating — in some years, up to 40% of produce is lost due to lack of storage and processing infrastructure. Meanwhile, climate change is making rainfall increasingly unpredictable, threatening food security for the entire constituency.

This manifesto commits to treating agriculture not as a charity activity but as an economic engine — one that can generate wealth, employment, and food security if properly supported through federal legislative advocacy, targeted interventions, and strategic partnerships.

Immediate Priorities (Years 1–2)

- Secure federal agricultural intervention funds (FADAMA, APPEALS, TRPII) for Gombi/Hong farmers, with ward-level distribution mechanisms to ensure funds reach those who need them.
- Facilitate the deployment of Agricultural Development Programme (ADP) extension workers to priority wards, providing technical support and farmer training.
- Advocate for the establishment of a Constituency Agricultural Input Depot — a central hub providing subsidised fertilisers, certified seeds, and pesticides to registered farmers.
- Push for emergency irrigation infrastructure along the Yederam River corridor, including rehabilitation of existing irrigation channels and construction of micro-dam facilities.
- Establish a Constituency Agricultural Emergency Fund to support farmers affected by floods, drought, or pest outbreaks.

AGRICULTURE & RURAL DEVELOPMENT

Medium-Term Commitments (Years 3–4)

- Facilitate the establishment of at least two Agro-Processing and Value-Addition Centres — one in Gombi, one in Hong — providing milling, drying, cold storage, and packaging services.
- Champion the creation of a Gombi/Hong Commodity Market that connects farmers directly to buyers, eliminating exploitative middlemen and improving farmer income.
- Advocate for registration of all farming cooperatives in the constituency with the Bank of Agriculture and NIRSAL for access to affordable agricultural credit.
- Promote precision farming techniques and climate-smart agriculture through partnerships with IITA, Embrapa Nigeria, and relevant federal institutions.
- Support livestock development and veterinary outreach, ensuring that Fulani herders, cattle farmers, and small animal producers have access to veterinary services.

Farmer-Herder Peace Framework

The conflict between farming communities and herders is one of the most urgent security and development challenges in our constituency. This is not simply a security problem — it is a resource allocation, governance, and policy failure. I will:

- Advocate for the designation of structured grazing reserves in both LGAs, with legally defined boundaries, to separate grazing from farmland.
- Facilitate multi-stakeholder dialogue forums bringing together Fulani herder associations, farmer cooperatives, traditional rulers, and security agencies.
- Push for federal investment in water infrastructure — troughs, ponds, and bore-hole networks — to reduce competition for water resources between farmers and herders.
- Champion the enactment of clear, enforceable federal policies on open grazing that protect both farmer livelihoods and herder rights.

YOUTH EMPOWERMENT & EMPLOYMENT

Our youths are not a problem to be managed — they are an asset to be unleashed. Every young person in Gombi/Hong who has ambition and talent deserves a system that works for them.

The Youth Crisis

Gombi/Hong's youth population is its greatest resource and its most pressing challenge. Unemployment among young people — especially those who have completed secondary or tertiary education — exceeds 40% by conservative estimates. Many migrate to Yola, Maiduguri, or Abuja in search of opportunity, draining the constituency of its most dynamic talent. Those who remain often face a choice between informal, low-income livelihoods and engagement with criminal or insurgent networks. This is not acceptable.

The root causes are structural: inadequate vocational training infrastructure, limited private sector investment, absence of entrepreneurship ecosystems, and a disconnect between federal employment programmes and the communities they are supposed to serve.

Skills and Vocational Training

- Establish at least one Youth Skills and Innovation Hub per LGA — fully equipped centres offering digital skills, vocational trades (welding, tailoring, carpentry, electrical installation, plumbing), agri-business training, and entrepreneurship incubation.
- Partner with ITF (Industrial Training Fund), NITDA, and SMEDAN to deliver federal-standard vocational programmes with certification recognised by employers.
- Facilitate a Gombi/Hong Digital Academy providing coding, graphic design, digital marketing, and data analytics training — preparing youth for the global digital economy.
- Support artisan registration and certification to help skilled tradespeople access government contracts and formal employment.

YOUTH EMPOWERMENT & EMPLOYMENT

Employment Creation

- Secure constituency-based allocations under federal employment programmes — NPOWER, GEEP, Youth Investment Fund — with transparent and verifiable beneficiary selection.
- Leverage personal business networks to create direct private sector internship and employment pipelines for qualified youth from the constituency.
- Advocate for a constituency-specific quota in federal civil service recruitment, ensuring Gombi/Hong youths get their fair share of federal jobs.
- Promote the establishment of SME clusters — concentrations of small businesses in specific trades that share infrastructure, supply chains, and markets.

Entrepreneurship and Innovation

- Establish a Barguma Youth Entrepreneurship Fund — a non-partisan seed funding facility for young entrepreneurs in Gombi/Hong, open to applications across all sectors.
- Facilitate access to Bank of Industry (BOI) youth loans, Nigerian Youth Investment Fund, and NIRSAL micro-enterprise guarantees.
- Partner with academic institutions and technology incubators to mentor and support youth-led startups in agritech, edtech, healthtech, and creative industries.
- Promote sports and creative arts as viable economic pathways, providing facilities and federal academy referrals for talented youth.

EDUCATION FOR ALL

An educated constituency is a powerful constituency. Every child in Gombi and Hong — regardless of gender, ethnicity, religion, or economic background — deserves access to quality education.

The Education Gap

Educational outcomes in Gombi/Hong fall significantly below national averages. Enrolment rates, particularly at secondary level and for girls, are suppressed by poverty, cultural barriers, and inadequate infrastructure. Many school buildings are in severe disrepair — crumbling walls, leaking roofs, absent furniture. Teacher shortages are endemic: many schools lack qualified subject teachers in science, mathematics, and English. ICT infrastructure is virtually non-existent. Adult literacy rates, particularly among women above 35, remain concerning low. These are not natural conditions — they are the result of years of under-investment and absent representation.

Infrastructure and Environment

- Facilitate construction and rehabilitation of classroom blocks, sanitation facilities, and administrative buildings across primary and secondary schools in both LGAs through federal constituency project funding.
- Ensure every school has access to clean drinking water — drilling boreholes or connecting to existing water schemes where feasible. Furnish
- Classrooms with desks, chairs, and learning materials through partnerships with UBEC and state education authorities. Establish girls'-only toilet
- facilities in mixed schools to improve enrolment and retention of female students.

EDUCATION FOR ALL

Teaching and Learning Quality

- Advocate for the deployment of qualified teachers to schools in Gombi/Hong through federal teacher deployment schemes, particularly for STEM subjects.
- Facilitate TRCN certification support and professional development for teachers currently serving without formal certification.
- Introduce school-based ICT labs — providing computers, internet connectivity, and digital literacy resources to secondary schools.
- Support the Nigerian Educational Research and Development Council (NERDC) to contextualise curriculum content to reflect Northern Nigerian history, ecology, and culture.

Access and Retention

- Establish the Barguma Educational Endowment Fund — providing bursaries and scholarships to brilliant but indigent students for tertiary and vocational education.
- Work with the Universal Basic Education Commission (UBEC) to fund school feeding programmes, improving attendance and reducing dropout rates.
- Champion conditional cash transfer programmes targeting families who keep girls in school.
- Support adult literacy programmes — particularly for women — in collaboration with NMEC and community-based organisations.

HEALTH CARE IMPROVEMENT

Health is not a privilege — it is a right. The men, women, and children of Gombi/Hong deserve a healthcare system that is present, functional, and accessible in their moment of need.

Healthcare Realities in the Constituency

The healthcare situation in Gombi/Hong is a quiet emergency. Primary Healthcare Centres (PHCs) — the first point of contact for most residents — are chronically understaffed, under-equipped, and under-funded. Many lack even basic diagnostic equipment such as blood pressure monitors, malaria rapid diagnostic tests, or weighing scales. The nearest referral hospitals are often hours away from remote communities — a distance that costs lives daily, particularly during obstetric emergencies. Maternal mortality, infant mortality, and vaccine-preventable disease rates remain unacceptably high.

Primary Healthcare Strengthening

- Advocate for the upgrade of all Primary Healthcare Centres in Gombi/Hong to Tier 2 status — with functional maternity wards, laboratories, pharmacies, and emergency stabilisation capacity.
- Secure NPHCDA (National Primary Health Care Development Agency) grants for comprehensive PHC renovation and equipping.
- Push for permanent staffing of PHCs with at least one Community Health Officer, one nurse-midwife, and one laboratory technician.
- Facilitate the establishment of a Community Health Insurance Scheme with NHIA (National Health Insurance Authority) for the constituency, providing subsidised healthcare access to the poor.

HEALTH CARE IMPROVEMENT

Maternal, Child, and Reproductive Health

- Champion targeted federal funding for maternal health infrastructure — functional delivery rooms, skilled birth attendants, and blood transfusion capacity.
- Facilitate mobile ante-natal and immunisation outreach to remote communities not served by fixed health facilities.
- Advocate for the construction of a fully equipped Maternal and Child Health Centre in each LGA.
- Support UNFPA and UNICEF-partnered programmes for adolescent reproductive health, family planning, and child nutrition.

Mental Health and Conflict Recovery

The psychological toll of years of insurgency, displacement, and community trauma in Hong and surrounding areas has been largely invisible in policy discussions. Mental health is not a luxury — it is essential for individual recovery and community cohesion.

- Advocate for federal investment in psychosocial support services for IDPs and conflict-affected communities in Hong LGA.
- Facilitate training of community health workers in basic mental health first aid and trauma-informed care.
- Partner with mental health NGOs to deliver community-based counselling and support group programmes.

INFRASTRUCTURE DEVELOPMENT

Roads, water, power, and connectivity are not luxuries — they are the physical foundations of economic life. Without them, no development programme can succeed. With them, no community is too remote to prosper.

Roads and Transport

The road network serving Gombi/Hong Federal Constituency is in a state of advanced deterioration. The federal roads traversing the constituency — particularly the Gombi-Hong-Mubi axis — are riddled with potholes, damaged bridges, and sections that become impassable during the rainy season. This infrastructure failure has cascading consequences: it raises the cost of goods and services, undermines agricultural marketing, discourages investment, and increases the risk of road traffic accidents.

- Pursue aggressive legislative advocacy to secure federal budget allocations for the rehabilitation and reconstruction of all federal roads passing through the constituency.
- Engage the Federal Roads Maintenance Agency (FERMA) for emergency road maintenance interventions on priority sections.
- Advocate for the construction of new bridge crossings and culverts at flood-prone points along the Gombi-Hong-Mubi corridor.
- Facilitate the designation of key rural access roads as federal rural roads eligible for RAMP (Rural Access and Mobility Project) funding.

INFRASTRUCTURE DEVELOPMENT

Electricity and Energy

Power supply to Gombi/Hong is erratic to non-existent for the majority of communities. Homes, schools, health facilities, and businesses operate without reliable electricity, preventing the use of medical equipment, refrigeration for vaccines, and digital devices for education.

- Champion constituency-level rural electrification projects under the Rural Electrification Agency (REA), prioritising schools, health centres, and markets.
- Advocate for solar hybrid mini-grid installations in communities too remote for national grid extension.
- Facilitate the provision of solar-powered boreholes and streetlighting in key community locations.
- Work with the Ministry of Power to expand the national grid into unserved wards of both LGAs.

Water and Sanitation

- Secure federal funding for the construction and rehabilitation of water supply infrastructure — including gravity-fed schemes, hand pumps, and motorised borehole systems.
- Advocate for the upgrading of water treatment and distribution systems in Gombi and Hong towns.
- Facilitate open defecation-free (ODF) community certification programmes in partnership with RUWASA and UNICEF WASH programmes.
- Promote household sanitation improvement through community-led total sanitation (CLTS) approaches.

WOMEN EMPOWERMENT & GENDER EQUITY

A constituency that marginalises its women is a constituency that operates at half capacity. The full and equal participation of women in economic, social, and political life is not a gender issue it is a development imperative.

The Position of Women in Gombi/Hong

Women in Gombi/Hong bear a disproportionate burden of domestic labour, childcare, and subsistence farming while receiving a disproportionately small share of economic resources, credit, political representation, and social support. Rates of early marriage, school dropout among girls, and gender-based violence — while difficult to measure accurately — are significant concerns. Women's cooperatives and businesses face structural barriers: lack of collateral for loans, cultural restrictions on independent economic activity, and limited access to markets and training. This manifesto commits to dismantling these barriers.

Economic Empowerment

- Facilitate women's access to federal micro-credit facilities — TraderMoni, MarketMoni, FarmerMoni — with women-only constituency allocation quotas.
- Establish a Women's Enterprise Hub in each LGA providing business training, mentorship, market access, and cooperative registration support.
- Advocate for the formal recognition and financing of women's cooperative societies, enabling them to access Bank of Agriculture loans and NIRSAL guarantees.
- Support women in the food processing and agri-business value chain — training in preservation, packaging, and quality standards to access wider markets.

WOMEN EMPOWERMENT & GENDER EQUITY

Social Protection and Welfare

- Push for expansion of the National Social Investment Programme (NSIP) Conditional Cash Transfer to cover more women-headed households in Gombi/Hong.
- Advocate for universal birth registration — ensuring all children born in the constituency are registered, improving access to social services.
- Champion the implementation of the Violence Against Persons Prohibition (VAPP) Act across Adamawa State with specific attention to Gombi/Hong communities.
- Facilitate the establishment of a Women and Girls Safe Space in each LGA, offering legal aid, counselling, and referral services for survivors of gender-based violence.

Political Participation

- Commit to nominating women in at least 35% of all constituency-level appointments and advisory roles under my legislative purview.
- Establish a Young Women in Leadership Programme — a structured mentorship and civic education initiative for young women aspiring to public service.
- Advocate for the adoption of reserved seats for women in local government councils within the constituency as an affirmative action measure.

SECURITY, PEACE & COMMUNITY STABILITY

There is no development without security. Our people have endured too much — too long. A Barguma administration will place peace-building and the rehabilitation of affected communities at the heart of our legislative agenda.

The Security Context

Gombi/Hong Federal Constituency has experienced the devastating effects of the Boko Haram insurgency more acutely than most. Hong LGA in particular witnessed multiple community attacks, mass displacement, destruction of property, and the loss of irreplaceable lives. While the security situation has improved significantly since the height of the insurgency, remnants of instability — banditry, inter-communal violence, kidnapping, and cattle rustling — continue to threaten livelihoods and wellbeing. Thousands of internally displaced persons (IDPs) remain in camps or with host communities, awaiting the conditions needed for safe and dignified return.

Security Architecture

- Advocate for increased military and police operational presence in vulnerable border communities and along insecurity-prone corridors in the constituency.
- Push for the establishment of a Forward Operating Base (FOB) of the Nigerian Army

or police mobile unit closer to communities at highest risk.

- Support community-based security mechanisms — Civilian Joint Task Force (CJTF), community vigilance groups — with federal funding for training, equipment, and communication infrastructure.
- Advocate for intelligence-led security operations, combining community information networks with formal security agencies.

Community Peace-Building

- Establish a Gombi/Hong Peace and Reconciliation Forum — a multi-stakeholder platform bringing together traditional rulers, religious leaders, farmers, herders, youth groups, and security agencies.
- Support inter-community dialogue programmes addressing root causes of conflict — land, water, identity, and historical grievances.
- Facilitate the reintegration of ex-combatants and conflict-affected youths through vocational training, counselling, and community mediation.

SMALL BUSINESS, TRADE & ECONOMIC GROWTH

The economic engine of Gombi/Hong is not the government — it is the thousands of traders, artisans, mechanics, tailors, and entrepreneurs who wake up every day and build something with their hands. They deserve a representative who fights for them.

Business Environment

Small and medium enterprises (SMEs) are the lifeblood of local economies in Gombi/Hong. From the market women of Hong town to the hardware dealers of Gombi, from the motorcycle taxi operators to the welders and mechanics who keep machinery running — these businesses create the majority of employment and drive the local economy. Yet they operate in conditions of near-total neglect: no access to formal credit, poor market infrastructure, burdensome informal taxes, no business development services, and limited connectivity to wider markets.

Market Infrastructure and Trade Facilitation

- Facilitate the construction of a modern, covered market complex in both Gombi and Hong towns, with proper stalls, storage facilities, sanitation, and electricity.
- Advocate for the designation of a Commodity Exchange Point for agricultural produce in the constituency, improving price discovery and reducing

middlemen exploitation.

- Support the rehabilitation of feeder roads connecting farming communities to market towns, reducing transport costs and post-harvest losses.
- Facilitate the registration of informal market associations with CAC, enabling them to access corporate banking and formal credit.

Access to Finance

- Advocate for constituency-level allocation of Bank of Industry (BOI) and BOA loans — with simplified application processes accessible to rural entrepreneurs.
- Facilitate access to SMEDAN business development services — free training, business plan development, and mentoring for SME owners.
- Champion microfinance institution expansion into Gombi/Hong, providing savings and credit products tailored to local economic conditions.
- Support the creation of Savings and Credit Cooperative Organisations (SACCOs) among trader and artisan groups.

SOCIAL WELFARE & INCLUSIVE DEVELOPMENT

Development is not real unless it reaches the most vulnerable. No widow, no orphan, no person living with disability, no elderly person without support will be invisible under this representation.

Persons Living with Disabilities (PWDs)

The Discrimination Against Persons with Disabilities (Prohibition) Act 2018 mandates equal rights and non-discrimination for PWDs. Yet in Gombi/Hong, persons living with disabilities face barriers at every level: no accessible public infrastructure, limited educational opportunities, near-total exclusion from employment, and absence from political representation.

- Advocate for constituency-specific PWD inclusion quotas in federal employment programmes, skills training, and social protection schemes.
- Facilitate the provision of assistive devices — wheelchairs, hearing aids, white canes, prosthetics — to registered PWDs in both LGAs through NCRBNA and development partners.
- Push for full implementation of accessibility standards in all public buildings and infrastructure projects in the constituency.
- Establish a Disability Rights Monitoring Desk within the constituency office to receive complaints and facilitate government response.

Elderly Citizens and Social Protection

- Champion the expansion of the National Social Investment Programme (NSIP) to cover all elderly persons without pension income in Gombi/Hong.
- Advocate for the Expanded Social Register to be updated and expanded, ensuring no eligible household in the constituency is left off the list.
- Facilitate the construction of a Senior Citizens Centre in each LGA — offering health monitoring, social activities, and community support.
- Support legal protection for elderly persons against property grabbing and familial neglect.

Emergency and Humanitarian Support

- Establish a Constituency Emergency Response Desk — a standing mechanism coordinating swift government and NGO response to natural disasters, floods, and security crises.
- Maintain a Humanitarian Relief Fund to provide immediate assistance to affected households during emergencies, without waiting for bureaucratic delays.
- Advocate for a pre-positioned emergency stockpile of food, non-food items, and medical supplies — managed through NEMA's Maiduguri zonal office — accessible for deployment to Gombi/Hong within 48 hours of any declared emergency.

LEGISLATIVE AGENDA

Good intentions mean nothing without legislative action. Here is precisely what I will do in the National Assembly — the bills I will sponsor, the committees I will seek, and the debates I will lead.

Bills and Motions I Will Sponsor

- A bill to establish a Special Economic Zone for North-East Nigeria, attracting investment and creating manufacturing and agribusiness jobs in Adamawa, Borno, Yobe, Taraba, Gombe, and Bauchi states.
- A motion calling for emergency federal road rehabilitation funding for all federal roads in Adamawa State's Gombi/Hong-Mubi axis.
- A bill strengthening farmer-herder conflict resolution mechanisms at federal level — establishing mandatory rangeland management commissions in affected states.
- A private member bill expanding NHIA (National Health Insurance Authority) coverage to include informal sector workers and rural residents in underserved constituencies.
- A motion calling for a federal investigation into the unequal distribution of federal appointments, agencies, and parastatals — with a call for North-East equity in representation.

Committee Priorities

I will actively seek membership on the following House of Representatives Committees, where I can make the greatest difference for Gombi/Hong:

- Agriculture — to champion farmer support programmes, irrigation, and food systems policy

- Health to advocate for PHC reform, NHIA expansion, and maternal health financing
- Works and Infrastructure — to fight for federal road rehabilitation in the constituency
- Education — to champion school infrastructure funding and teacher deployment
- Local Content and SME Development — to expand economic opportunities for local businesses

Constituency Development Fund (CDF) Utilisation Plan

The Constituency Development Fund represents a direct channel through which federal legislators can deliver tangible projects. I commit to the following principles for CDF management:

- Full transparency: all CDF projects will be published on www.hassanbarguma.com and at the constituency office.
- Community-driven: project selection will be based on community needs assessments conducted in all wards.
- Equitable distribution: no single ward will receive disproportionate CDF allocation at the expense of others.
- Third-party verification: all completed projects will be inspected and verified by independent community monitors.
- No ghost projects: every project funded must be physically verifiable and in use by the community.

ACCOUNTABILITY AND TRANSPARENCY

ACCOUNTABILITY & CONSTITUENCY ENGAGEMENT

Representation must be visible, accessible, and accountable. I will not disappear to Abuja. I will be in this constituency — physically and digitally — every month I serve.

Constituency Office Operations

I will establish and fully staff permanent constituency offices in both Gombi and Hong towns — not satellite offices that open only during campaigns, but year-round, fully functional service centres for constituents.

- Office hours: Monday to Friday, 8am to 5pm, with designated Saturday community hours.
- Staffed by a Constituency Relations Officer, a Projects Coordinator, and a Public Complaints Desk.
- Physical presence for document assistance, referrals, complaint resolution, and information on federal government services.
- A free-to-call constituency hotline staffed during office hours.

Transparency and Reporting

- Publish a Quarterly Constituency Report covering: legislative activities, budget allocations, project updates, committee engagements, and upcoming initiatives — distributed in print and online.
- Maintain a live project tracker on www.hassanbarguma.com showing every CDF project from proposal through completion, with photos, costs, and community feedback.
- Hold an Annual Constituency Accountability Forum — an open public meeting in each LGA where constituents interrogate the representative's performance.
- Submit annual personal asset declarations and constituency fund utilisation reports to the ICPC and publish on the constituency website.

Community Engagement

- Monthly ward-level visits across all wards in Gombi and Hong, alternating between the two LGAs.
- Quarterly town hall meetings — open to all citizens — in major communities.
- A Youth Advisory Council — 20 young people from across both LGAs — meeting semi-annually to advise on youth policy priorities.
- A Women's Consultative Forum — meeting quarterly to provide gender perspectives on constituency development.
- An Elders' Council engagement — regular consultation with traditional and religious leaders on community needs and conflict.

OUR CORE GOVERNING VALUES

- **INTEGRITY** — We lead by example. No compromise on ethical standards, transparent resource management, or honest communication with constituents.
- **ACCOUNTABILITY** — Every kobo of public funds is publicly accountable. Every project is publicly tracked. Every promise is publicly recorded.
- **EXPERIENCE** — We bring four years of legislative service, business acumen, and humanitarian work to every decision and advocacy effort.
- **INCLUSIVENESS** — No ward, no community, no group is invisible. Our representation serves every resident of Gombi/Hong equally.
- **RESULTS FIRST** — We measure success not by speeches but by projects delivered, laws passed, services improved, and lives changed.
- **PEOPLE FIRST** — Before party politics, before personal ambition — always the people of Gombi and Hong.

A MESSAGE TO THE PEOPLE OF GOMBI & HONG

This manifesto is the most detailed and comprehensive commitment ever made to the people of this constituency. Now it requires your vote to become a reality.

Every word in this manifesto was written with a specific face in mind. The mother in Hong who walks three hours to a health centre that has no drugs. The young man in Gombi with a diploma and no job. The widow who farms alone because her husband was killed in the insurgency. The girl who dropped out of secondary school because her family couldn't pay the fees. The farmer who watched half his harvest rot because there was no storage and no road to market.

This manifesto is for them. Every policy, every bill, every CDF project, every committee seat I will fight for is in their service. Because they are not just my constituents — they are my people. I know their names. I know their villages. I have drunk water from the same streams and walked the same roads.

I am not offering you a government programme. I am offering you a covenant — a personal, binding, public commitment that I will fight harder than anyone who has ever represented this constituency. I have the experience, the networks, the resources, and above all the will to deliver. What I need is your mandate.

Gombi/Hong deserves a seat at the table in Abuja. It deserves roads that carry its produce to markets. It deserves clinics that save its mothers. It deserves schools that educate its children. It deserves a representative who shows up — every single day — and fights for those things. That representative is me.

"Gombi/Hong Federal Constituency will rise — not because a government was kind enough to notice us, but because we elected a representative powerful enough to demand our rights."

On election day, make the right choice. Make the choice for experience over inexperience. For a proven track record over empty promises. For someone who has already built something for you, over someone who has not. Vote for a representative who will answer your calls, attend your funerals, celebrate your weddings, and fight your battles in Abuja.

VOTE HON. HASSAN MAMMAN BARGUMA
VOTE LABOUR PARTY

Vote for Experience. Vote for Integrity. Vote for Results.
Vote for a Better Gombi/Hong.
